

Vision:

To impart the best technical and management education instilled with discipline, values and leadership qualities that will produce professional technocrats.

Mission:

1. To contribute to the social and economic development of this drought prone rural region through professional education.
2. To prepare graduates who will engage effectively and responsibly in practicing of engineering and management profession in ever changing global economy.
3. To contribute and to be a role model for a green and eco-friendly campus through solar energy.

Goals & Objectives:

The goal of the Shell Scripting Certificate Program is to introduce the UNIX operating system. Students will be able to learn basic UNIX commands. The main objective of this certificate program provides Shell programming knowledge on how to write, execute and debug shell scripts. This program will help students to understand the basics of Shell Scripting and to introduce them to scripting language under the Bourne shell.
